DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 12/16/03 has been entered.

Claims 1-13 and 23-25 are pending in the application and were examined on the merits.

Claim Rejections - 35 USC § 103

Claims 1-13 and 23-25 remain rejected under 35 U.S.C. 103(a) as being unpatentable over Gorsek (US 6,383,482 B1) in view of Eisenberg (1998).

Applicant's arguments pointed out that the Examiner did not address claim 23 in the Final Office action. It is noted that the previous Office Action should have read 'Claims 23-25', since each embodiment of claim 23 was clearly addressed in the rejection. This was an inadvertent typographical error.

Applicant argues that 'Gorsek fails to disclose, teach or suggest, an appetite suppressant and weight loss composition comprising the combination of green tea, green tea leaf extract, HMB and a chromium additive (p.8, Arguments). "The deficiencies of Gorsek are not cured when combined with Eisenberg...Eisenberg teaches that HMB is not an appetite suppressant...the article discloses that one person taking HMB as a supplement gained three pounds in the first five days and gained 12 more pounds over the next two weeks" (p.8, Arguments).

In response to applicant's arguments against the references individually, one cannot show nonobviousness by attacking references individually where the rejections are based on combinations of references. See *In re Keller*, 642 F.2d 413, 208 USPQ 871 (CCPA 1981); *In re Merck & Co.*, 800 F.2d 1091, 231 USPQ 375 (Fed. Cir. 1986).

In the Instant case, it is known in the art that HMB causes the decrease of fat tissue as well as an increase in muscle tissue in athletes. HMB is not an appetite suppressant. Although the Instant claims state 'appetite suppressant', this does not mean that each constituent in the composition is an appetite suppressant.

The Examiner has combined these references in order to show an obvious combination of elements, even if the reasoning is different from Applicant's. It is deemed that the composition disclosed by Gorsek for increasing fat metabolism, would have been obvious to combine with HMB as disclosed by Eisenberg to create a composition for athletes which possessed additive fat burning capabilities, coupled with additional muscle building capabilities. The fact that applicant has recognized another

advantage which would flow naturally from following the suggestion of the prior art cannot be the basis for patentability when the differences would otherwise be obvious. See *Ex parte Obiaya*, 227 USPQ 58, 60 (Bd. Pat. App. & Inter. 1985).

No Claims are allowed.
